**GENERAL INFORMATION:** MaxSO™ is a special blend of methylated seed oil and Non-Ionic Surfactants. Its functions are to perform better than MSOs by increasing wetting, spreading, and retention of agricultural applications including: Herbicides, Desiccants, and Defoliants. MaxSO™ performance can vary with interactions of changing conditions affecting the amount needed. MaxSO™ is not generally used in crop applications, as it may increase phytotoxicity, see manufacturer's label or local recommendations.

**DIRECTIONS FOR USE:** USE THIS PRODUCT ONLY AS SPECIFIED ON THE LABEL. MaxSO™. Pesticide labels normally have adjuvant recommendations and should be considered when using MaxSO™. MaxSO™ should be considered as an MSO (methylated seed oil) for label recommendations. Typical use rate is 1%v/v or 1 gallon per 100 gallons of spray solution. The addition of an MSO type adjuvant to some herbicides or pesticides may cause phytotoxicity. Prior to the addition of MaxSO™ to spray mixes as an oil adjuvant type not specifically recommended or prohibited by the manufacturer, the applicator or supervisor must have experience with this combination or conduct a phytotoxicity trial.

**MIXING RECOMMENDATIONS:** MaxSO™ should be added last to the spray solution before the active ingredient are added. Fill the tank half full with water. Then add active ingredients. Typically Dry Flowables and Wettable Powders are added first followed by Aqueous Solution and Emulsifiable Concentrates. Finish filling the tank and then add MaxSO™. Maintain constant agitation.

**USE RATES:** MaxSO™ adjuvant is normally used at a rate of 1gallon per 100 gallons of spray mixture. Most applications with Aqueous Solution (AS), such as glyphosate should follow these directions.

DO NOT EXCEED A RATE OF 2.5% OF FINAL SPRAY VOLUME WITH THIS PRODUCT. NOT FOR AQUATIC USE.

### STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL. STORAGE: Do not store at temperatures above 140°F. DISPOSAL: Triple rinse container and pour rinse into spray tank. Do not reuse container. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit [www.acrecycle.org](http://www.acrecycle.org). Dispose of contents/container in accordance with local/national regulations.
